Author Index for Volume 59 (2002)

Aggarwal, M.L., V. Sarin and P. Singh, Optimal orthogonal designs in two blocks for Becker's mixture models in three and four components	(4)	385–396
Akita, K. and M. Maejima, On certain self-decomposable self-similar processes with independent increments	(1)	53– 59
Bai, Z.D. and K.S. Kwong, Solution to Dalal and Mallows conjecture on monotone property of the joint distribution of order statistics	(1)	29– 35
Balan, R.M., Set-indexed processes with independent increments	(4)	415–424
Basawa, I.V., *see* Park, J.-g.	(3)	235–244
Bloznelis, M., A note on the multivariate local limit theorem	(3)	227–233
Boudou, A. and Y. Romain, On spectral and random measures associated to discrete and continuous-time processes	(2)	145–157
Brazauskas, V., Fisher information matrix for the Feller–Pareto distribution	(2)	159–167
Castro, G. and V. Girardin, Maximum of entropy and extension of covariance matrices for periodically correlated and multivariate processes	(1)	37– 52
Chaabane, F., Invariance principles with logarithmic averaging for continuous local martingales	(2)	209–217
Cheng, C., Almost-sure uniform error bounds of general smooth estimators of quantile density functions	(2)	183–194
Cheng, F., Consistency of error density and distribution function estimators in nonparametric regression	(3)	257–270
Cheng, Y., Q. Tang and H. Yang, Approximations for moments of deficit at ruin with exponential and subexponential claims	(4)	367–378
Chiu, G., R. Lockhart and R. Routledge, Bent-cable asymptotics when the bend is missing	(1)	9– 16
Cramer, E., U. Kamps and T. Rychlik, On the existence of moments of generalized order statistics	(4)	397–404
Cui, L., The IFR property for consecutive-k-out-of-n:F systems	(4)	405–414
Davydov, Y. and R. Zitikis, Convergence of generalized Lorenz curves based on stationary ergodic random sequences with deterministic noise	(4)	329–340
De Vinney, J. and J.C. Wierman, A SLLN for a one-dimensional class cover problem	(4)	425–435
Devanarayan, V. and L.A. Stefanski, Empirical simulation extrapolation for measurement error models with replicate measurements	(3)	219–225
Ducinskas, K. and J. Saltyte, Second-order asymptotic expansion for the risk in classification of curved exponential populations	(3)	271–279
Evangelaras, H., C. Koukouvinos and P. Mantas, A unified approach in addition or deletion of two level factorial designs	(2)	125–133
Falk, M. and R.D. Reiss, A characterization of the rate of convergence in bivariate extreme value models	(4)	341–351
Fang, H.-B., *see* Kotz, S.	(2)	195–207
Gagnon, G., Stability of option prices under uniform ellipticity	(4)	361–365
Gannoun, A. and J. Saracco, A new proof of strong consistency of kernel estimation of density function and mode under random censorship	(1)	61– 66
Ghomrasni, R. and S.E. Graversen, An extension of Seshadri's identities for Brownian motion	(4)	379–384
Girardin, V., *see* Castro, G.	(1)	37– 52
Gitelman, A.I., *see* Tableman, M.	(2)	169–181
Graversen, S.E., *see* Ghomrasni, R.	(4)	379–384
Hahn, M.G., *see* Jiang, X.	(1)	75– 81
Hwang, J.H., B.U. Park and W. Ryu, Limit theorems for boundary function estimators	(4)	353–360
Jiang, X. and M.G. Hahn, Empirical central limit theorems for exchangeable random variables	(1)	75– 81
Johnson , B.C., The distribution of increasing 2-sequences in random permutations of arbitrary multi-sets	(1)	67– 74
Kamps, U., *see* Cramer, E.	(4)	397–404
Kotz, S., H.-B. Fang and G. Wei, Multiple square tray distributions	(2)	195–207
Koukouvinos, C., *see* Evangelaras, H.	(2)	125–133
Kumar, C.S., Extended generalized Hypergeometric probability distributions	(1)	1– 7
Kwong, K.S., *see* Bai, Z.D.	(1)	29– 35
Li, R. and D.K.J. Lin, Data analysis in supersaturated designs	(2)	135–144
